Craft Wines with Sustainability at their Core

Wine Monkey exists to bring together a collection of lesser-known craft wines that celebrate sustainability, whether environmental, human, economic and/or social, and to support the producers who see and care about the bigger picture.

Our wine selection has been carefully curated by our owner Bryan. His vast experience in the wine industry has taken him around the world. We are excited to showcase the incredible wines, producers and regions that he's met along the way and share them with you.

Our Philosophy

Hospitality is at the very core of what we do. We are passionate about responsible wine and food, believe in creating an environment that is warm, welcoming and puts our customers' needs first. Whether you are joining us for dinner, enjoying a fantastic glass of something in our wine bar or looking for a bottle to take home, our aim is to make your experience both enjoyable and memorable.

Our Partner Wine Producers

We are proud to collaborate with many incredible independent family-run wine producers, who are leading the way in sustainable viticulture. Not only do they make fantastic wines, but they are working hard to be the (much-needed) change in the industry, so we'd encourage you to support them as well.

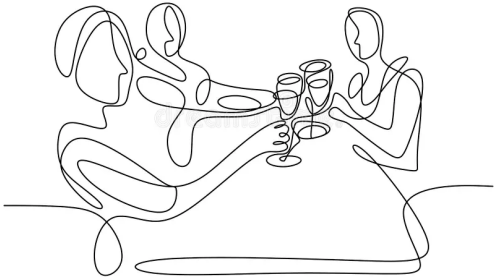

Prices listed are to drink in.
Wines are also available from our bottle shop at retail price.
